

Collaboration between **open source** and research communities empowers open hardware to **explore** new grounds and hopefully deliver on the “third industrial revolution”.

The first edition of the **Exceptionally Hard and Soft Meeting** featured lectures delivered by **international** makers, hackers, scientists and engineers on topics such as nuclear fusion, chip design, vacuum equipment machining, and applied quantum physics. Tutorials gave a welcoming hands-on introduction to people of all levels, including kids.

EHSM is back on **June 27-29, 2014**
In Hamburg
for another edition of the most cutting-edge open source conference.

This year we are proud to welcome you to an exceptional venue:
DESY, Europe's second-largest particle physics laboratory!
